

+ Appleton ATX's Bulkhead Luminaires and Floodlights

Appleton's ATX lighting fixtures are the right choice, whenever interior and exterior industrial areas need safe, reliable lighting to protect people, facilities and ensure productivity. From petrochemical refineries to offshore platforms to grain storage areas, food processing plants and the production floors of virtually any type of manufacturing, Appleton's ATX luminaires are there, withstanding every type of challenge, environment condition and hazard inherent to those environments.

**Appleton's  
HBDC Series Luminaires**

Cylindrical Bulkhead Luminaires  
Zone 1, 2, 21, 22 | Flameproof

[IECEX certified »](#)

The image shows two cylindrical bulkhead luminaires. One is shown from a side-on perspective, revealing its internal components like the lamp holder and reflector. The other is shown from a front-on perspective, highlighting its cylindrical shape and mounting flange.

These compact cylindrical luminaires have a flameproof rating and are suitable for use in stairways, small area and emergency exits due to its compact fixture. Zamak end cap and cover, anticorrosion treated, thermo-shock and impact-resistant glass sealed tube; galvanised steel reflector, painted white; zinc plated steel guard makes HBDC ideal for emergency lights. With different lamp holder, HBDC series can be used with incandescent, fluorescent, high pressure sodium, indicators or even compact fluorescent lamps.

**Appleton's  
PN Series Floodlights**

Floodlights  
Zone 2, 21, 22 | Weatherproof

[IECEX certified »](#)

The image shows two PN series floodlights. One is a square floodlight with a black frame and a clear lens, mounted on a black adjustable arm. The other is a smaller, rectangular floodlight with a similar design.

Appleton's rugged, powerful, efficient PN series floodlights are suitable for large areas such as industrial complexes, ship loading areas and hazardous areas. These integrally ballasted floodlights come in a rugged die-cast aluminium construction. These are also equipped with thermal shock and impact resistance glass lens and reflectors with double segment compound parabolic with Azlack® finish for maximum efficiency. These are available in either standard glass sealed on frame or external polycarbonate weatherproof protection.
